

# SmartPOS

*Retail Management System*

Can you imagine a modern retail store without Point of Sales System? Do you know that even today, significant numbers of businesses are handicapped with "glorified cash registers". Instead of simply receiving cash and making a lengthy paper roll of your sales through cash register, the strategic advantage that an intelligent and integrated SmartPOS System can bring is the increased capability in managing your store, inventory, ordering, sales, customers, suppliers and accounting books - and this all happens just by scanning and few clicks.

Any POS software can save your time, increase accuracy and provide greater control over what happens at the sales counter. But most systems involve high prices, complex setup and big training requirements. SmartPOS from ParagonEDS is the alternative that removes these barriers with an easy to use, affordable system.

## SmartPOS

ParagonEDS's SmartPOS can speed up check-out time - thus satisfying customers, increased accuracy in sales - avoid reconciliation process, and decreases counter chaos. Designed by experienced professionals on industry practices by using latest technologies, SmartPOS is relatively a low cost solution which fulfills the need of small to medium stores and large chain of stores as well. Considering different sizes of business (small, midsize and large), SmartPOS is available in two different versions:

- No counter queues
- Accurate sales recording
- Faster check-outs
- Organized inventory
- Effective reporting
- Automated alerts

SmartPOS - Enterprise  
SmartPOS - Light
